DID YOU KNOW?

We custom manufacture a wide range of products specific to customer needs in industries in NZ and overseas. All items in this catalogue are our 'standard' design and finish. Check out our website for our full range of products and services. We have an extensive range of CNC and other equipment including NZ's most powerful CNC fiber laser cutter. And our coatings division can add the finishing touch too, i.e. zinc plating, powdercoating, galvanising, etc. So whether it's one of our standard products or a variation of them, or a completely unique product of your own that you need manufactured – for 1-offs, small runs or mass production...

WE DO IT ALL SO GIVE US A CALL!

TROUGH BOSS

Code	Description	Unit
TB	Trough boss ballcock protector, adjustable, Zinc plated. Fits over the wall of a concrete water trough to protect the ballcock arm from breakage by cattle. Adjustable to fit most concrete troughs. Bottom slot fits over ballcock fitting. Protruding rod protects the fittings from cattle stepping on them. Easily fitted and removable within seconds, shift to the next paddock with your cattle. Protect your trough fittings AND save water.	EA
